

Series 2050

Garden Window

The Series 2050 Garden Window adds a bright new dimension to window design.

The Series 2050 garden window is the only vinyl garden window on the market today with an AAMA Certified R-50 rating for units 60.5 x 60.5 inches and smaller.*

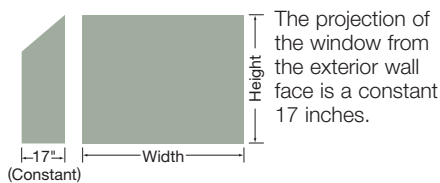

Structural Features

- Fully welded, rigid PVC vinyl frame for greater strength and stability.
- Aluminum and steel reinforcements in the front mullion.
- Vinyl frame will not chip, rot, or peel and will never need to be painted.
- Clear 1-inch insulated glass package.
- Top sloped insulating glass (a constant 35-degree pitch) is tempered for improved safety and unit integrity.
- Both vents and deadlites have a built-in weep system and external glazing.
- A two-part structural silicone is used to glaze the top slope and vertical deadlite portions of the unit.
- Snap-in sill cover for seatboard provides aesthetic appeal and weather resistance.
- Snap-in corner slope closure profile assures a tight weather seal.
- Exterior grade plywood headboard, seatboard and jamb are 1-1/4-inch for improved structural and thermal performance; support brackets are not needed.

- The window is shipped completely assembled for easy installation.
- Engineered for new construction and remodeling applications.
- Standard garden window jamb depths of 4-9/16, 5-1/4, 6-9/16, and 11 inches are available as well as custom jamb depths up to 31 inches to fit almost any application.

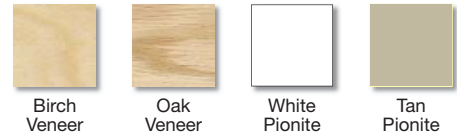

Operating Sash

- Locks and operators are mounted to the inside front area for easy access.
- Operators are sealed to prevent air and water infiltration.
- Twin sealing, fully screened, operating casements with external glazing for improved weather protection.
- The multi-point locking system provides a tighter seal and added security.

Colors and Options

- Headboard, seatboard and jamb are available in Birch, Oak and White or Tan Pionite.

- Standard frame colors are white and tan. Other colors are available by special order:

Champagne or Cocoa exterior with a White interior.

White exterior with a Colonial Cherry, Light Oak or Stainable Oak interior.

- Glass options include high performance Low-E and v-groove, along with a variety of grid designs.
- Insulation board with an "R" value of 5 can be installed under the seat board, increasing the "R" value to 6.22. This 1-inch thick lightweight rigid material is 100 percent waterproof.
- One or more adjustable 3/8-inch thick glass shelves with polished edges, brackets and standards.

*Although units of a larger size do not have the same R-50 "Coastal Rating," they still provide all of the features and options of the smaller sizes.

Please Note:

The design of this window has been upgraded to outperform our standard Series 2000 garden window, which it now replaces.
